To Whom It May Concern:

Applied Colour has been an outstanding service provider to Oxford Properties Group at Edmonton City Centre for many years.

Applied Colour offers a range of services that include more than just painting. Applied has been our consultant advising on standardizing colours for the complex and simplifying our painting needs. This has been huge in correcting deficiencies with different colours and sheens as well as giving us a basic platform to work with for our future needs.

Applied also does preventative maintenance for us by sighting painting deficiencies and bringing them to our attention before we are even aware. Applied offers a program to do timely walkthroughs and checks in our complex to ensure we are always on top of patch, repair, and painting jobs. This saves us a lot of time looking for deficiencies and it is one of the great benefits of being partnered with Applied Colour.

Our partnership with Applied Colour is greatly valued and I highly recommend their services to anyone looking to improve the look of their buildings. Applied has been our preferred provider for painting advice, service, on going maintenance, and capital projects. Above all, Applied is very customer service oriented and personable. The owner and staff are very hands on and accessible for any issue or concern. They always make the time for their customers.

For any further inquires, I would be more than happy to answer your questions. Please feel free to contact me at (780) 426-8450.

Sincerely,
OXFORD PROPERTIES GROUP
